Silo Venting Filter

DUSTSHAKE™ R01

Durable

WAMGROUP

WAM®

DUSTSHAKE™ R01 is a polygonal shaped **SILO VENTING FILTER** for silos which are filled by tankers.
Dust is separated from the dirty air flow by means of a multipocket polyester filter element. Dust drops back down into the silo after elctromechanical shaking of the filter element.

- Stainless steel body
- Hinged top cover enables quick replacement of filter elements module
- Removable front panel for comfortable inspection of filter media
- Easy to install

Silo Filling

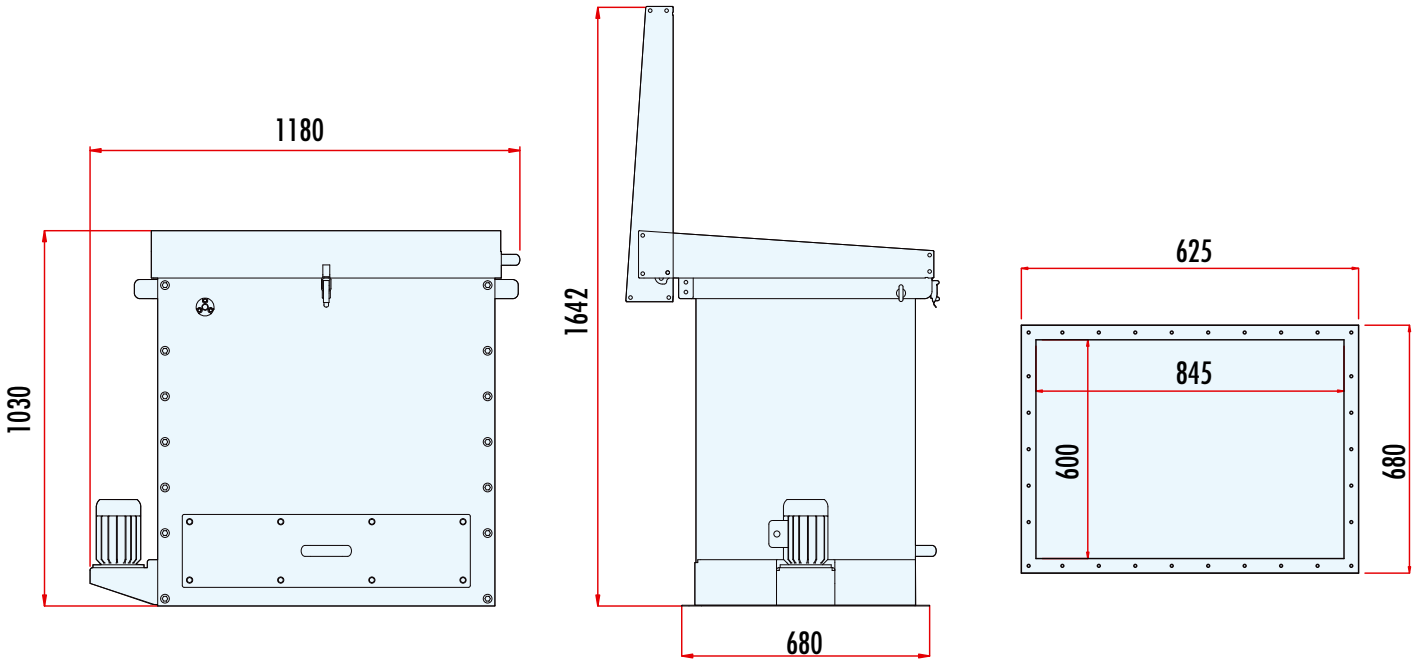

Dust is separated from the dirty air flow while clean air is evacuated from the filter

Filter Cleaning

Dust drops down into the silo due to shaking filter elements
